NOTE: Users may note differences in the count of registered (enrolled) students in this [Application to Enrollment Funnel](#) report compared with the new student counts in the [Enrollment Snapshot](#) report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the [Application to Enrollment Funnel](#) report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For *enrolled* students as reported in this [Enrollment Snapshot](#) report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the [Application to Enrollment Funnel](#) report presents counts only for students who have an application for the selected term. For the [Enrollment Snapshot](#) report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the [Application to Enrollment Funnel](#) report presents counts only for students who have an application for the selected term. For the [Enrollment Snapshot](#) report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

NOTE: Users may note differences in the count of registered (enrolled) students in this [Application to Enrollment Funnel](#) report compared with the new student counts in the [Enrollment Snapshot](#) report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the [Application to Enrollment Funnel](#) report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For *enrolled* students as reported in this [Enrollment Snapshot](#) report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the [Application to Enrollment Funnel](#) report presents counts only for students who have an application for the selected term. For the [Enrollment Snapshot](#) report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

The data are filtered on Term: **Spring 2026**, Student Population: **Exclude High School Students**

NOTE: Users may note differences in the count of registered (enrolled) students in this [Application to Enrollment Funnel](#) report compared with the new student counts in the [Enrollment Snapshot](#) report. Such differences are due, in part, to the way new student categories are defined in the two reports. New student categories for the [Application to Enrollment Funnel](#) report are based on the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. For *enrolled* students as reported in this [Enrollment Snapshot](#) report, new student categories are based first on data in the PROG REASON field of the PS\_ACAD\_PROG table, and if not available, then looks to the ADMIT TYPE field in CUNYfirst PS\_ADM\_APPL\_DATA table. If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the [Application to Enrollment Funnel](#) report presents counts only for students who have an application for the selected term. For the [Enrollment Snapshot](#) report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.

If the codes are discrepant in the two CUNYfirst tables, there will be inconsistencies in the counts by new student categories in the two reports. In addition, the [Application to Enrollment Funnel](#) report presents counts only for students who have an application for the selected term. For the [Enrollment Snapshot](#) report, students may enroll as new students (freshmen or transfers) in the selected term, even if they had applied for admission (but never enrolled) in an earlier term. So this also may account for differences in the count of students.
